CAREER OBJECTIVE:

MCA student at Brainware University (BCA CGPA: 9.88, MCA combined SGPA: 9.70 across Semester I & II) with hands-on experience in Python, Machine Learning, and Android Development. Published researcher at ICSCI 2025. Seeking a software engineering or AI/ML role where I can apply strong algorithmic thinking and build data-driven solutions that make a real-world impact.

RESEARCH & PUBLICATION

Intelligent Railway Gate Control System Using Microcontroller And Servo Motor

Journal: Science and Culture, Indian Science News Association (ISNA) | March – April 2026

TECHNICAL SKILLS:

- **Languages** – Python, Java
- **AI / ML:** Supervised, Unsupervised
- **Tools:** GitHub
- **Concepts:** DSA, OOP

ACADEMIC PROJECTS:

- **Iris Flower Classification – ML Classification System:** [\[link\]](#) **2026**
Developed a ML-based Iris Flower Classification system using Python and Scikit-learn to predict flower species based on sepal and petal measurements, including data preprocessing, model training, and performance evaluation.
- **Car Price Prediction – ML Regression System:** [\[Link\]](#) **2026**
From this project I learned the concept of linear regression the continues price prediction, data preprocessing, feature analysis.
- **GreenGrow Hub – Android Application for Farmers:** **2025**
Built an Android-based solution for farmers featuring seed and fertilizer recommendations, IoT-enabled irrigation control, 4-day weather forecasting, and a crop recommendation system that predicts suitable crops based on input parameters.
Used Tech: Android Using Java, ML using Python, Firebase, REST-API (NGROK), Weather API
